## **EXAMINER'S REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to disclose or suggest: (1) a method of securing a pellicle frame to a reticle comprising securing a pellicle between an inner pellicle frame and outer pellicle frame by means of heating the pellicle components to the specified temperature range, securing the inner pellicle frame to a reticle by heating an intervening polymer layer, wherein the inner pellicle frame has a coefficient of thermal expansion equal to or greater than the outer pellicle frame (claim 1); (2) a system comprising a flexible pellicle membrane, a pellicle frame assembly comprising an inner frame and outer frame which mechanically secure and stretch the pellicle membrane across the assembled frame, and an thermoplastic layer adhering the inner pellicle frame to a reticle while the outer pellicle frame remains unattached to the reticle, wherein the inner pellicle frame has a coefficient of thermal expansion equal to or greater than the outer pellicle frame (claim 27). SHIRASAKI '650 and IKEDA ET AL '019 and EYNON '754 fail to disclose the recited combination of pellicle components with the recited relative CTE values.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
